Job Offer: Senior Developer Position in a Text Analytics Startup (location: Berlin, Germany)

We are a startup in the seed phase developing a text analytics tool focused on marketing research. Currently, we are looking for a coder skilled in the field of unstructured data analytics (specifically: information retrieval and extraction). The requirements are as follows:

- You should have a creative and flexible mindset and a natural need to learn, dare and stretch yourself.
- Further desiderata are:
  - Graduate diploma (BSc, MSc, PhD) in Computer Science or related field
  - Experience and/or interest in the fields of machine learning and artificial intelligence
  - Languages: Python, Java
  - Solid skills and intuitions in statistics
- Since our project mainly focuses on the analysis of Chinese online texts, Chinese language skills, though not a must-have, would be a great supplement.

The new team member will be involved in the preparation of an application for the EXIST Start-Up Grant of the German government. The final task definition and scope of responsibility and commitment are to be discussed with the founders. Tasks include, but are not limited to:

- Development of crawling, information extraction and mining algorithms
- Design of the system architecture
- System, server and backend administration

If you are eager to work in a professional but fun team, enthusiastic about realizing a very promising idea and possibly becoming a shareholder in the company, please contact us with a CV and a short motivation letter at:
